EXPERIENCE

CAPPLUGS — Digital Media / Creative Intern Buffalo, NY | 2026

- 3D modeled Caplugs products from company catalog references using Blender, creating product visualizations for marketing and advertising.
- Created 3D renders and animated product videos for advertisements and digital marketing content.
- Produced and edited YouTube videos using Premiere Pro, After Effects, Blender, and Photoshop; created new branded thumbnails for the channel.
- Animated the Caplugs logo and developed branded motion graphics for digital video content.
- Translated technical products and business requirements into engaging visual concepts while applying brand standards, composition, typography, visual hierarchy, and aesthetic consistency.

SANAA CAFE — Graphics Design Buffalo, NY | Feb 2024 – June 2024

- Designed the cafe's menu graphics and promotional materials, translating business offerings into polished customer-facing visual communications.
- Developed a cohesive brand aesthetic and visual identity across menus, promotional graphics, product presentation, and customer communications.
- Managed social media and marketing while balancing with daily operations, inventory, and customer service.

SEPHORA AT KOHL'S — Beauty / Operations Associate Buffalo, NY | May 2024 - April 2026

- Supported visual merchandising, promotional displays, fixture organization, and brand presentation while maintaining established visual standards.
- Assisted with customer-facing promotional initiatives and maintained organized, detail-oriented product presentation in a fast-paced retail environment.

CREATIVE & TECHNICAL PROJECTS — UNIVERSITY AT BUFFALO

- Created graphic design, branding, photography, video, motion graphics, and 3D projects using Photoshop, Illustrator, Premiere Pro, After Effects, and Blender, applying typography, composition, color, hierarchy, and visual storytelling.
- Developed p5.js/JavaScript interactive web projects combining imagery, sound, animation, and user interaction; built digital artwork using HTML/CSS and creative coding.
- Created interactive Arduino and Max/MSP projects that translated real-time data such as temperature, altitude, and speed into dynamic imagery, animation, music, and sound.
- Developed 3D models, animations, and rendered compositions in Blender, including modeling, materials, lighting, camera composition, and animation.
- Managed creative projects from concept through production, revision, and final presentation, incorporating feedback and meeting project requirements and deadlines.
- Photographed and photoshopped designs for conceptual projects.
